Skills & Qualifications

spoken languages **English** (CEFR C1, FCE certified), German (CEFR A2, self-study), Polish (native)
software design **Actor Model, Functional Paradigm, Microservices**, Object-Oriented Design, REST, SOA, UML
programming C/C++, **Clojure**, D, **Erlang/OTP**, Java, PostgreSQL, Python, Scheme
toolchain Ansible, **Emacs**, **Git**, **GNU/Linux**, **L^AT_EX**, Org-Mode, Subversion, Vagrant, Valgrind
workflow Agile, **Continuous Integration**, Gamification, Pomodoro

Software Development Experience

Ubiquiti Networks Poland

2014-10 – 2015-12 **Software Developer**, *Payments team*, involved: **Clojure/Ring**, PostgreSQL, **Erlang/OTP**, Python/Django, Elasticsearch, Ansible.

I was developing a PCI-compliant credit card & payments management microservice in Clojure/Ring and PostgreSQL using **Authorize.Net**, **Stripe** & **PayPal** payment gateways. It was a part of a larger billing system of the Ubiquiti **airCRM** product. Additionally, I was helping to develop, refactor & maintain a few other projects written in Erlang/OTP & Python/Django.

Brainly.com (Zadane.pl sp. z o. o.)

2014-05 – 2014-08 **Erlang Developer / DevOps**, *Acceleration team*, involved: **Erlang/OTP**, Ansible, Vagrant.

I created Ansible provisioning scripts for automated Hive deployment in addition to performing general bug-fixing, refactoring and testing.

2013-05 – 2013-09 **Erlang Developer Intern**, *Acceleration team*, involved: **Erlang/OTP**, **Socket.IO**, Redis.

I developed two interesting projects, which were later released under Open Source licenses (**Hive** & **Flood**), from scratch using **Erlang/OTP** and various Web-related technologies such as the **Socket.IO** protocol or **Redis** databases.

Open Source projects

2015-11 – Present **λ-blog**, involves: **Clojure**, Bootstrap, jQuery.

A static site generator *generator* emphasizing **customizability** & **hackability**. It features: composable HTML generators, Twitter Bootstrap, Markdown support & a hacker-friendly way to **override anything and everything** without much hassle.

2013-05 – 2014-08 **Hive & Flood**, *Zadane.pl sp. z o.o.*, involved: **Erlang/OTP**, **Socket.IO**.

Hive is a highly scalable, Socket.IO-based web server designed to be used as a back-bone for various modular **Comet applications**. It provides an easy client session management, fast **Publisher/Subscriber** channels and a robust **plugins facility**. *Flood* is a complimentary, fully-featured load simulator suitable for automated Comet application stress-testing in a **continuous integration** environment.

2011-07 – 2013-03 **ASM programming language**, involved: **D programming language**, a lot of PL research.

A functional programming language I designed, featuring among others **PEG** based, dynamic reader, statically scoped, first-class, *vau-calculus*-flavoured **fexprs** and delimited meta-continuations. It is implemented in the D programming language in a highly Object Oriented fashion (for better or worse).

2011-01 – 2011-05 **LRRH Game**, *SKN Shader*, involved: **C++**, **OpenGL**, **SFML**, **Lua**, wxWidgets.

A game project I developed together with a team of 4-5, it is a beautiful logic-platformer loosely based on the Little Red Ridding Hood story by Charles Perrault. I was responsible for the game engine and a **particle system editor** implementation. Additionally, I maintained a native GNU/Linux port of the game.

Education

- 2014-02 – 2015-09 **Master of Engineering in Computer Science: Engineering of Intelligent Systems**,
Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering, AGH University of Science and Technology, Kraków, Poland.
- thesis title **Design of a programming language with support for distributed computing on heterogenous platforms.**
- description Project aims to develop a *platform aware* (as opposed to platform independent) programming language for distributed computing with automatic knowledge propagation in a highly dynamic, redundant & heterogenous environment such as the Internet of Things.
- thesis grade **5.0/5.0**
- final grade **4.5/5.0**
- 2010-10 – 2014-01 **Bachelor of Engineering in Computer Science**,
Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering, AGH University of Science and Technology, Kraków, Poland.
- thesis title **Implementation of a virtual machine for functional programming languages with support for concurrent computing.**
- description Project based on the Three Instruction Machine (TIM abstract machine) with Actor Model extenstions aiming for memory safety and high-speed asynchronous communication with no memory copying.
- thesis grade **5.0/5.0**
- final grade **4.5/5.0**

Additional coursework

- 2013-03 – 2013-05 **Algorithms part II**, *Coursera*, score: **98.25%** of the total points available.
Taught by Robert Sedgewick and Kevin Wayne.
- 2013-01 – 2013-03 **Programming Languages**, *Coursera*, score: **99.6%**.
Taught by Dan Grossman.
- 2012-09 – 2012-12 **Functional Programming Principles in Scala**, *Coursera*, completed with distinction (**100%**).
Taught by Martin Odersky, the creator of Scala.
- 2012-08 – 2012-09 **Algorithms part I**, *Coursera*, score: **97.44%** of the total points available.
Taught by Robert Sedgewick and Kevin Wayne.
- 2012-06 – 2012-08 **Introduction to Statistics**, *Udacity*, completed with highest distinction (**100%**).
Taught by Sebastian Thrun.
- 2012-02 – 2012-04 **Artificial Intelligence for Robotics**, *Udacity*, completed with highest distinction (**100%**).
Taught by Sebastian Thrun.
- 2011-10 – 2011-12 **Introduction to Artificial Intelligence**, *Udacity*, score: **94.3%**.
Taught by Peter Norvig and Sebastian Thrun.

Hobbies

- Programming Language design
- GTD techniques & Gamification
- Electronics & hardware design
