## Skills & Qualifications

spoken languages	<b>English</b> (CEFR C1, FCE certified), German (CEFR B1, self-study), Polish (native)
software design	<b>Actor Model</b> , <b>Functional Programming</b> , Microservices, OOD, REST, SOA
programming	C/C++, Clojure, Erlang/OTP, Java, PostgreSQL, Python, <b>Scala/Akka</b> , Scheme
web related	JavaScript, <b>React</b> , <b>Redux</b> , <b>TypeScript</b> , WebRTC
toolchain	Ansible, <b>Docker</b> , <b>Emacs</b> , <b>Git</b> , <b>GNU/Linux</b> , $\LaTeX$
workflow	<b>Agile</b> , Continuous Integration, Gamification, <b>GTD</b> , Org-Mode

## Software Development Experience

### Spartan Works

2016-05 – present **Founder**

Current focus is **full-stack** and **dev-ops** consultancy in various fields of the industry. Internal projects involve programming language research & development as well as hardware design.

### StackState BV (Xebia Group)

2018-03 – present **Fullstack Engineer, Consultant**

I'm helping to make IT Operations accessible and pleasant. Main responsibilities:

- Developing and maintaining company's core product's backend using Scala, Akka and Zio.
- Building and maintaining a frontend application using TypeScript, React and Redux.
- Integrating with different data sources, including ElasticSearch, Splunk and Azure Monitor.
- Improving security by introducing Groovy script sandboxing and Java Security Manager policies.
- Designing and implementing a system of plugins - StackPacks.
- Integrating in-house built AIOps Anomaly Detection solution into the application.

### Coya AG

2017-10 – 2018-02 **Fullstack Engineer, Consultant**

I helped create a next-generation insurance company. Main responsibilities:

- Developing and maintaining core microservices using Scala/Akka and Cats.
- Introducing Wartremover to the backend code.
- Building a responsive frontend application using Elm.
- Integrating Stripe.js into the frontend application.

### Ratel.io (Contactis Group Sp. z o. o.)

2016-05 – 2017-10 **Software Engineer, Consultant**

I was building an AI- & WebRTC-powered VoIP communications platform - Ratel. Main responsibilities:

- Architecting, setting up & maintaining the Ratel infrastructure using Docker and Ansible.
- Introducing Wartremover and Scalastyle to most of the backend code.
- Developing and maintaining several core microservices using Scala/Akka, Cats and PostgreSQL.
- Building and maintaining a WebRTC-heavy, JavaScript-transpiled TypeScript SDK.
- Developing a frontend application using TypeScript, React & Redux.
- Interviewing and mentoring new developers.

### Ubiquiti Networks Poland

2014-10 – 2015-12 **Software Developer, Payments team**

I was developing the UCRM product (formerly airCRM) for Ubiquiti's WISP customers. Main responsibilities:

- Developing and maintaining a PCI-DSS-compliant payments processor in Clojure/Ring and PostgreSQL.
- Integrating with Authorize.Net, Stripe and PayPal payment gateways.
- Integrating payments with the rest of the UCRM billing system.
- Maintaining and refactoring of several other microservices in Python/Django as well as Erlang/OTP.

## Open Source projects

- 2015-01 – 2018-04 **The F00F programming language experiment**  
A programming language compiler & runtime environment I started developing during my masters thesis research, which I later released as an open source project. Its goal is to create a spartan compiler & a runtime system for a Lisp-like language, useful as a playground for testing new programming language features.
- 2015-11 – 2016-03 **λ-blog**  
A static site generator *generator* written in Clojure & JavaScript emphasizing **customizability & hackability**. It features: composable HTML generators, Twitter Bootstrap, Markdown support & a hacker-friendly way to **override anything and everything** without much hassle.
- 2013-05 – 2014-08 **Hive & Flood, Zadane.pl sp. z o.o.**  
*Hive* is a highly scalable, Socket.IO-based Erlang web server designed to be used as a back-bone for various modular **Comet applications**. It provides an easy client session management, fast **Publisher/Subscriber** channels and a robust **plugins facility**. *Flood* is a complimentary, fully-featured load simulator suitable for automated Comet application stress-testing in a **continuous integration** environment.

---

## Education

- 2014-02 – 2015-09 **Master of Engineering in Computer Science:  
Engineering of Intelligent Systems,**  
*Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering,  
AGH University of Science and Technology, Kraków, Poland*
- thesis title **Design of a programming language with support for distributed computing on heterogenous platforms.**
- description Project aims to develop a *platform aware* (as opposed to platform independent) programming language for distributed computing with automatic knowledge propagation in a highly dynamic, redundant & heterogenous environment such as the Internet of Things.
- thesis grade **5.0/5.0**
- final grade **4.5/5.0**
- 2010-10 – 2014-02 **Bachelor of Engineering in Computer Science,**  
*Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering,  
AGH University of Science and Technology, Kraków, Poland*
- thesis title **Implementation of a virtual machine for functional programming languages with support for concurrent computing.**
- description Project based on the Three Instruction Machine (TIM abstract machine) with Actor Model extentions aiming for memory safety and high-speed asynchronous communication with no memory copying.
- thesis grade **5.0/5.0**
- final grade **4.5/5.0**

---

## Hobbies

- Experimental computer archaeology
- Electronics & hardware design
- Programming Language design
- 3D printing & modeling
