Kajetan Rzepecki

Resumé (as of May 19, 2017)

Skills & Qualifications

spoken languages English (CEFR C1, FCE certified), German (CEFR A2, self-study), Polish (native)

software design Actor Model, Functional Programming, Microservices, OOD, REST, SOA, UML programming C/C++, Clojure, D, Erlang/OTP, Java, PostgreSQL, Python, Scala/Akka, Scheme

web related Bootstrap, Comet/Push, JavaScript/TypeScript, WebRTC, WebSockets

electronics AVR, Eagle CAD, GHDL/gtkWave, Lab Equipment Usage, VHDL

toolchain Ansible, Emacs, Docker, Git, GNU/Linux, LATEX, Subversion, Vagrant workflow Agile, Continuous Integration, Gamification, GTD, Org-Mode

Software Development Experience

Ratel.io (Contactis Group Sp. z o. o.)

2016-05 – present **Software Engineer**

I'm building an AI- & WebRTC-powered VoIP communications platform - Ratel. Main responsibilities:

- o Architecting, setting up & maintaining the Ratel infrastructure using Docker and Ansible.
- o Introducing Wartremover and Scalastyle to most of the backend code.
- o Developing and maintaining several core microservices using Scala, Akka and PostgreSQL.
- Building and maintaining a JavaScript-transpiled TypeScript Web SDK and a React frontend app.
- Interviewing and mentoring new developers.

Spartan Works

2016-05 - present Founder

Current focus is programming language research & development as well as hardware design.

Ubiquiti Networks Poland

2014-10 – 2015-12 **Software Developer**, Payments team

I was developing the UCRM product (formerly airCRM) for Ubiquiti's WISP customers. Main responsibilities:

- Developing and maintaining a PCI-compliant credit card & payments management microservice in Clojure/Ring and PostgreSQL.
- Integrating with Authorize.Net, Stripe and PayPal payment gateways.
- Integrating payments with the rest of the UCRM billing system.
- Maintaining and refactoring of several other microservices in Python/Django as well as Erlang/OTP.

Brainly.com (Zadane.pl Sp. z o. o.)

2014-05 – 2014-08 Erlang Developer / DevOps, Acceleration team

Main responsibilities:

- Stress-testing, refactoring and fixing uncovered bugs.
- Creating Ansible provisioning scripts for automated Hive deployment.

2013-05 – 2013-09 **Erlang Developer Intern**, Acceleration team

I was optimizing the company's main products' backend - a Comet/PUSH server. Main responsibilities:

- Developing and maintaining a generic Socket.IO server called Hive, using Erlang/OTP and Redis.
- o Building a custom, highly parallel stress-testing tool, Flood, along with various test scenario scripts.
- o Preparing an Open-Source release of both Hive & Flood.

Open Source projects

 $2015-11 - 2016-03 \lambda$ -blog

A static site generator generator written in Clojure & JavaScript emphasizing customizability & hackability. It features: composable HTML generators, Twitter Bootstrap, Markdown support & a hacker-friendly way to override anything and everything without much hassle.

2013-05 - 2014-08

Hive & Flood, Zadane.pl sp. z o.o.

Hive is a highly scalable, Socket.IO-based Erlang web server designed to be used as a back-bone for various modular Comet applications. It provides an easy client session management, fast Publisher/Subscriber channels and a robust plugins facility. Flood is a complimentary, fully-featured load simulator suitable for automated Comet application stress-testing in a continuous integration environment.

2011-07 - 2013-03 ASM programming language

A functional programming language I designed, featuring among others **PEG** based, dynamic reader, statically scoped, first-class, *vau-calculus*-flavoured **fexprs** and delimited meta-continuations. It is implemented in the D programming language in a highly Object Oriented fashion (for better or worse).

Education

2014-02 – 2015-09 Master of Engineering in Computer Science:

Engineering of Intelligent Systems,

Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering, AGH University of Science and Technology, Kraków, Poland

thesis title Design of a programming language with support for distributed computing on heterogenous platforms.

description Project aims to develop a *platform aware* (as opposed to platform independent) programming language for distributed computing with automatic knowledge propagation in a highly dynamic, redundant & heterogenous environment such as the Internet of Things.

thesis grade 5.0/5.0

final grade **4.5**/5.0

2010-10 - 2014-02 Bachelor of Engineering in Computer Science,

Faculty of Electrical Engineering, Automatics, Computer Science and Biomedical Engineering, AGH University of Science and Technology, Kraków, Poland

thesis title Implementation of a virtual machine for functional programming languages with support for concurrent computing.

description Project based on the Three Instruction Machine (TIM abstract machine) with Actor Model extentions aiming for memory safety and high-speed asynchronous communication with no memory copying.

thesis grade 5.0/5.0

final grade **4.5**/5.0

Additional coursework

2013-03 – 2013-05 Algorithms part II, Coursera, score: 98.25% of the total points available

Taught by Robert Sedgewick and Kevin Wayne.

2013-01 - 2013-03 Programming Languages, Coursera, score: 99.6%

Taught by Dan Grossman.

2012-09 – 2012-12 Functional Programming Principles in Scala, Coursera, completed with distinction (100%)

Taught by Martin Odersky, the creator of Scala.

2012-08 – 2012-09 **Algorithms part I**, *Coursera*, score: **97.44%** of the total points available

Taught by Robert Sedgewick and Kevin Wayne.

2012-06 – 2012-08 Introduction to Statistics, *Udacity*, completed with highest distinction (100%)

Taught by Sebastian Thrun.

2012-02 – 2012-04 Artificial Intelligence for Robotics, *Udacity*, completed with highest distinction (100%)

Taught by Sebastian Thrun.

2011-10 – 2011-12 Introduction to Artificial Intelligence, *Udacity*, score: **94.3%**

Taught by Peter Norvig and Sebastian Thrun.

Hobbies

- Experimental computer archaeology
- Electronics & hardware design
- Programming Language design
- o GTD techniques & Gamification
